Notes

¹ Includes PRs and visitors residing in dorms. Breakdown of dorm cases into those detected through surveillance and those isolated before detection is not available before 24 Aug.

² 272 cases were reported before early Apr, and constitute the 1st wave of imported cases.

³ Cases who were already quarantined and tested during quarantine to determine their status.

⁴ Cases who were identified through surveillance testing, such as the bi-weekly Rostered Routine Testing (RRT) of at-risk workers and testing of those with Acute Respiratory Illness (ARI) symptoms.

⁵ Incidence rates are rounded to two significant figures.

Figure 1.7: Average Number of Days from Onset of Symptoms to Isolation (QO, hospital admission or notification to MOH) for Community Cases Detected through Surveillance in Each Day

Line represents the 14-day moving average; Bar represents the daily average⁷

⁶ Date of notification was used for cases that did not display any symptoms. The numbers with onset in the past few days may see an increase as more cases are notified.

⁷ Area in grey demarcates data points for the past 3 days where some cases may still be pending epidemiological investigation. The bar graph shows the daily average number of days from symptoms onset to isolation, while the line graph shows the moving average for the past 14 days. Both graphs exclude cases with no onset date (asymptomatic) in the computation of the average. Community cases with symptoms who are isolated on the same day that symptoms occurred would have an isolation time of 0. There is a gap in the line graph from 16 to 18 Sep as there are no symptomatic cases in the preceding 14 days.

Figure 1.8: Weekly Reclassifications of Previously Reported Cases (*next update will be on 17 May*)

	Imported	Community Linked	Community Unlinked	Dorm Residents	Total
Total number of cases as at 03 May	4,308	1,599	810	54,518	61,235
Cases reported 04 May - 10 May	111	19	13	0	143
Net reclassifications of previously reported cases, incorporated 04 May - 10 May	1	4	-5	0	0
Total number of cases as at 10 May	4,420	1,622	818	54,518	61,378

Case Number	PR date	Occupation	Link Reclassification	Rationale for Link Reclassification
62032	17-Apr-21	Photographer	Community Unlinked → Community Linked (Household)	Case was asymptotically and likely infected by his wife, who is serology positive.
62526	28-Apr-21	Project Manager	Community Unlinked → Imported (Nepal) - Overseas infection	Case has recent travel history to Nepal. He is likely an intermittent shedder previously infected overseas.
62684	1-May-21	Stevedore	Dorm Unlinked → Dorm Linked to Cluster 61822	Case visited Pasir Panjang Terminal canteen.
62691	1-May-21	Stevedore	Dorm Unlinked → Dorm Linked to Cluster 61822	Case works at Pasir Panjang Terminal.
62940	8-May-21	Cleaner	Community Unlinked → Community Linked to Cluster 62873	Case works at Changi Airport Terminal 3.
62942	8-May-21	Safety Coordinator	Community Unlinked → Community Linked to Cluster 62873	Case works at Changi Airport Terminal 3.
62945	8-May-21	Aviation Officer	Community Unlinked → Community Linked to Cluster 62873	Case works at Changi Airport Terminal 3.

(2) Imported COVID-19 Cases

Figure 2.1: Serology and Symptom Status of Imported Cases Reported from 30 Apr to 06 May

Symptoms	S+	S-	Not Serology Tested	Pending Serology Result	Total No. of Cases
Asymptomatic	53	39	0	7	99
Symptomatic	3	12	0	1	16
Total	56	51	0	8	115

Figure 2.2: Weekly Total Number of Imported Cases, Imported Cases that are S- and Arrivals from 30 Nov 20 to 25 Apr 21 (next update will be on 17 May)⁸

⁸ Data from the past 2 weeks are excluded as arrivals on SHN who arrived in the past 2 weeks may not have their SHN exit test results yet. "Imported Cases that are S-" comprises imported cases who are (a) serology negative; or (b) not tested for serology. "Imported Cases with Ct values 30 and below" have low Ct values which are suggestive of high viral load. Notwithstanding, Ct values should be interpreted with caution along with other epidemiological and clinical factors.

(3) Number of COVID-19 Cases in Hospitals and Community Care Facilities**Figure 3.1:** Summary of Confirmed Cases by Status in the Past 14 Days
