Notes

¹ Includes PRs and visitors residing in dorms. Breakdown of dorm cases into those detected through surveillance and those isolated before detection is not available before 24 Aug.

² 272 cases were reported before early Apr, and constitute the 1st wave of imported cases.

³ Cases who were already quarantined and tested during quarantine to determine their status.

⁴ Cases who were identified through surveillance testing, such as the bi-weekly Rostered Routine Testing (RRT) of at-risk workers and testing of those with Acute Respiratory Illness (ARI) symptoms.

⁵ Incidence rates are rounded to two significant figures.

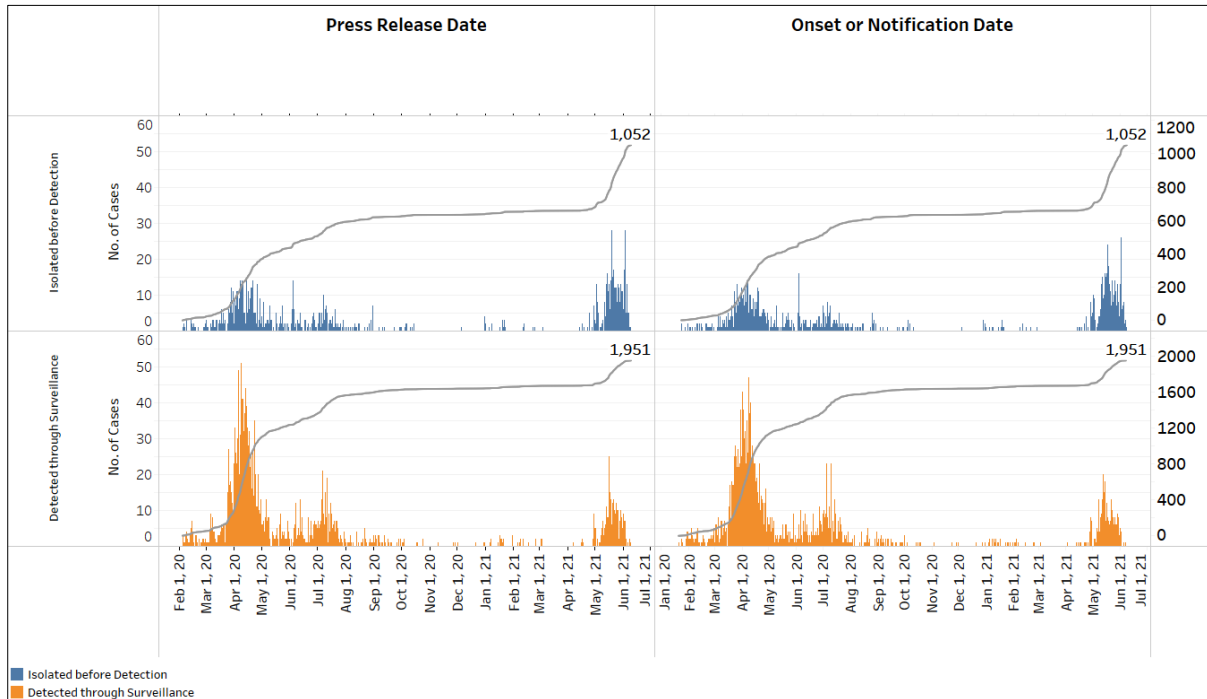

Figure 1.7: Average Number of Days from Onset of Symptoms to Isolation (QO, hospital admission or notification to MOH) for Community Cases Detected through Surveillance in Each Day

Line represents the 14-day moving average; Bar represents the daily average⁷

⁶ Date of notification was used for cases that did not display any symptoms. The numbers with onset in the past few days may see an increase as more cases are notified.

⁷ Area in grey demarcates data points for the past 3 days where some cases may still be pending epidemiological investigation. The bar graph shows the daily average number of days from symptoms onset to isolation, while the line graph shows the moving average for the past 14 days. Both graphs exclude cases with no onset date (asymptomatic) in the computation of the average. Community cases with symptoms who are isolated on the same day that symptoms occurred would have an

| | Imported | Community Linked | Community Unlinked | Dorm Residents | Total |
|--|----------|------------------------------|--|---|--------|
| Total number of cases as at 31 May | 4,633 | 2,004 | 890 | 54,524 | 62,051 |
| Cases reported 1 Jun - 7 Jun | 54 | 89 | 16 | 0 | 159 |
| Net reclassifications of previously reported cases, incorporated 1 Jun - 7 Jun | 1 | 17 | -18 | 0 | 0 |
| Total number of cases as at 07 Jun | 4,688 | 2,110 | 888 | 54,524 | 62,210 |
| Case Number | PR date | Occupation | Link Reclassification | Rationale for Link Reclassification | |
| 62439 | 5 Jun 21 | Student | Community Unlinked → Imported (UK) - Overseas infection | Case has recent travel history to UK. She is likely an intermittent shedder previously infected overseas. | |
| 62688 | 5 Jun 21 | Manager | Community Unlinked → Community Linked (62371) | Case 62688 is phylogenetically linked to case 62371 who was an imported case from Chennai. Both cases stayed at the same hotel. | |
| 62873 | 6 May 21 | Cleaner At T3 Changi Airport | Community Unlinked → Community Linked (62654) | Case is the index case of his cluster. He is phylogenetically linked to imported case 62654 and there was transient contact between both cases at the airport. | |
| 63127 | 5 Jun 21 | Domestic Worker | Community Unlinked → Community Linked (Cluster 63127) | Case is phylogenetically linked to other cases linked to White Sands mall. She had visited White Sands mall during the same period as other confirmed cases during their infectious period. | |
| 63147 | 5 Jun 21 | Domestic Worker | Community Unlinked → Community Linked (Cluster 63127) | Case is phylogenetically linked to other cases linked to White Sands mall. | |
| 63166 | 5 Jun 21 | Cook | Community Unlinked → Community Linked (White Sands) | Case is the index case of his cluster and is phylogenetically linked to other cases linked to White Sands mall. He had visited White Sands mall during the same period as other confirmed cases during their infectious period. | |

isolation time of 0. There is a gap in the line graph from 16 to 18 Sep as there are no symptomatic cases in the preceding 14 days.

| Case Number | PR date | Occupation | Link Reclassification | Rationale for Link Reclassification |
|-------------|-----------|----------------------|--|---|
| 63286 | 3 Jun 21 | Unemployed | Community Unlinked → Community Linked (Cluster 63289) | Case stays at 506 Hougang Ave 8 and is linked to 63055 who also stays in the same block. |
| 63290 | 16 May 21 | Unemployed | Community Unlinked → Community Linked (JEM/WG) | Case visited JEM on 10 May 21. |
| 63292 | 3 Jun 21 | Digital Web Designer | Community Unlinked → Community Linked (Cluster 63289) | Case was visiting his parent's family who stayed at 506 Hougang Ave 8. He is phylogenetically linked to Cluster 63286. |
| 63354 | 3 Jun 21 | Teacher | Community Unlinked → Community Linked (Cluster 63335) | Case is phylogenetically linked to the 63335 cluster. Case had visited the office of Pacific Law Corporation in the infectious period of other cases from the company. |
| 63379 | 5 Jun 21 | Registry Officer | Community Unlinked → Community Linked (Cluster 63127) | Case is phylogenetically linked to other cases linked to White Sands mall. She had visited White Sands mall during the same period as other confirmed cases during their infectious period. |
| 63392 | 3 Jun 21 | Finance Manager | Community Unlinked → Community Linked (Cluster 63289) | Case stays at 506 Hougang Ave 8 and is phylogenetically linked to Cluster 63286. |
| 63543 | 5 Jun 21 | Operations Manager | Community Unlinked → Community Linked (White Sands) | Case is the index case of his cluster and is phylogenetically linked to other cases linked to White Sands mall. He had visited White Sands mall during the same period as other confirmed cases during their infectious period. |
| 63609 | 3 Jun 21 | Housewife | Community Unlinked → Community Linked (Cluster 63289) | Case stays at 506 Hougang Ave 8 and is phylogenetically linked to Cluster 63286. |

| Case Number | PR date | Occupation | Link Reclassification | Rationale for Link Reclassification |
|-------------|-----------|----------------------------|--|---|
| 63757 | 3 Jun 21 | Retiree | Community Unlinked → Community Linked (Cluster 63289) | Case stays at 506 Hougang Ave 8 and is phylogenetically linked to Cluster 63286. |
| 63876 | 3 Jun 21 | Media Content Producer | Community Unlinked → Community Linked (Cluster 63806) | Case works at A'Posh BizHub. |
| 63908 | 31 May 21 | Operations Support Officer | Community Unlinked → Community Linked (Cluster 63887) | Given that the Case (Daughter 3 of case 63940) has visited case multiple times during the infectious period (on 23 and 26 May), it is likely that 63908 (onset on 28 May) acquired the infection from 63940. As such, 63908 (local unlinked) will be linked to Cluster 63887. |
| 63999 | 30 May 21 | Housewife | Community Unlinked → Community Linked (Cluster 63286) | Case stays at 506 Hougang Avenue 8. |

(2) Imported COVID 19 Cases

Figure 2.1: Serology and Symptom Status of Imported Cases Reported from 27 May to 02 Jun

| Symptoms | S+ | S- | Not Serology Tested | Pending Serology Result | Total No. of Cases |
|--------------|-----------|-----------|---------------------|-------------------------|--------------------|
| Asymptomatic | 37 | 14 | 0 | 2 | 53 |
| Symptomatic | 3 | 1 | 0 | 0 | 4 |
| Total | 40 | 15 | 0 | 2 | 57 |

Figure 2.2: Weekly Total Number of Imported Cases, Imported Cases that are S- and Arrivals from 28 Dec 20 to 23 May 21 (next update will be on 14 June)⁸

⁸ Data from the past 2 weeks are excluded as arrivals on SHN who arrived in the past 2 weeks may not have their SHN exit test results yet. "Imported Cases that are S-" comprises imported cases who are (a) serology negative; or (b) not tested for serology. "Imported Cases with Ct values 30 and below" have low Ct values which are suggestive of high viral load. Notwithstanding, Ct values should be interpreted with caution along with other epidemiological and clinical factors.
