

Open Clusters

Epidemiological investigations and contact tracing have uncovered links between cases.

- i. 4 of the confirmed cases (Cases 61360, 61461, 61470 and 61917) are linked to the Case 61360 cluster, with the most recent case (Case 61917) linked to the cluster on 13 April. Case 61360 is a 50 year-old male Colombian national who arrived from Papua New Guinea for a work project in Singapore and was confirmed to have COVID-19 infection on 30 March. Cases 61461 and 61470 were identified as his close contacts during their flight to Singapore, and Case 61917 was a workplace close contact of Cases 61461 and 61470.

Those who had been identified as close contacts of confirmed cases would already have been notified by MOH.

As a precautionary measure, persons who had been at these locations during the specified timings should monitor their health closely for 14 days from their date of visit. They should see a doctor promptly if they develop symptoms of acute respiratory infection (such as cough, sore throat and runny nose), as well as fever and loss of taste or smell, and inform the doctor of their exposure history.

Individuals may access the SafeEntry Location Matching Self-Check service via the TraceTogether App, SingPass Mobile, or at <https://wereyouthere.safeentry.gov.sg> to check whether they were at these locations during the specified timings, based on their own SafeEntry records.

There is no need to avoid places where confirmed cases of COVID-19 have been. The National Environment Agency will engage the management of affected premises to provide guidance on cleaning and disinfection.

¹ Excludes residence, workplaces, healthcare facilities and public transport. This list will be updated on a rolling 14-days basis, i.e. one incubation period, and as epidemiological investigations progress.
