Total since start of outbreak	581	756	271	153	4	1,184	443	123	72	5	643	1,827	ı	40,024	ı	42,432
Population at risk <sup>4</sup>												5,381,000		323,000		5,704,000
Prevalence												0.03%		12.39%		0.74%

<sup>&</sup>lt;sup>1</sup> Previously we had tracked the work permit holders living outside dormitories as a separate category, and put a large number of these workers on Stay Home Notices (SHN). The SHN for these workers has since expired. Hence we have now updated the definition of "Cases in the Community" to include all cases (including amongst work permit holders) that are detected outside of the dormitories.

 $<sup>^{\</sup>rm 2}$  Includes cases pending epi-investigation.

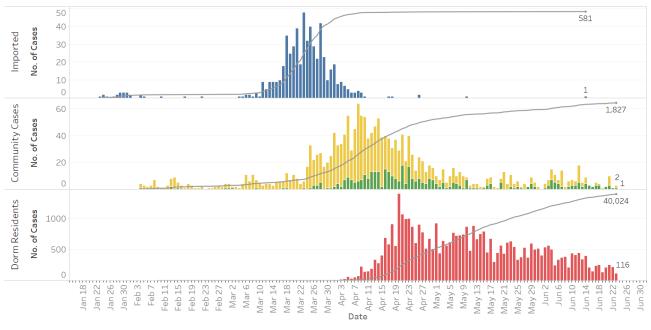

<sup>&</sup>lt;sup>3</sup> Includes Training Work Permit (TWP) holders.

<sup>&</sup>lt;sup>4</sup> Population at risk for community cases includes SC/PRs and work pass holders not residing in dormitories. Source: MOM and Singstat.

Figure 1.2: Epidemic Curve of the COVID-19 Outbreak by Press Release Date

#### COVID-19 Cases

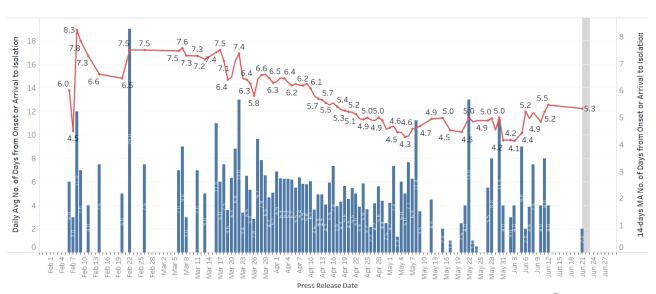

- ImportedCommunity Cases: SC/PR + G or F (other pass types) + Visitors
- Community Cases: G or F (work permit)
- Dorm Residents

Press Release Date Onset or Notification Date \_ 1.184 1 194 Community Linked 40 of Cases 30 800 20 Š. 400 10 Community Unlinked 600 20 No. of Cases 15 ġ 10 5 Jun 1 Feb. Mar May. = Apr Apr Community Cases Community Cases: SC/PR + G or F (other pass types) + Visitors

**Figure 1.4**: Epidemic Curve of Linked and Unlinked Cases among the Community by Press Release Date (left panel) and by Symptom Onset or Notification Date<sup>5</sup> (right panel)

■ Community Cases: G or F (work permit)

Line represents the 14-day moving average; Bar represents the daily average<sup>7</sup>

<sup>&</sup>lt;sup>5</sup> Date of notification was used for cases that did not display any symptoms. The numbers with onset in the past few days may see an increase as more cases are notified.

<sup>&</sup>lt;sup>6</sup> Area in grey demarcates the data points for the past 3 days where some cases are still pending investigation. The bar chart shows the daily average number of days from onset date to isolation, while the line chart shows the moving average for the past 14 days. Both charts exclude cases with missing onset dates in the computation of the average.

<sup>&</sup>lt;sup>7</sup> Asymptomatic community unlinked cases are not reflected in this chart. Community unlinked cases with symptoms who are isolated on the same day that symptoms occurred would have an isolation time of 0.

## (2) Number of COVID-19 Cases in Hospitals and Community Care Facilities

Figure 2.1: Summary of Confirmed Cases by Status in the Past 14 Days

Press	-	Admitted in spitals	In Care	Total Rec	Total	Tatal
