#### **Notes**

<sup>&</sup>lt;sup>1</sup> Includes PRs and visitors residing in dorms. Breakdown of dorm cases into those detected through surveillance and those isolated before detection is not available before 24 Aug.

<sup>&</sup>lt;sup>2</sup> 272 cases were reported before early Apr, and constitute the 1<sup>st</sup> wave of imported cases.

<sup>&</sup>lt;sup>3</sup> Cases who were already quarantined and tested during quarantine to determine their status.

<sup>&</sup>lt;sup>4</sup> Cases who were identified through surveillance testing, such as the bi-weekly Rostered Routine Testing (RRT) of at-risk workers and testing of those with Acute Respiratory Illness (ARI) symptoms.

<sup>&</sup>lt;sup>5</sup> Incidence rates are rounded to two significant figures.

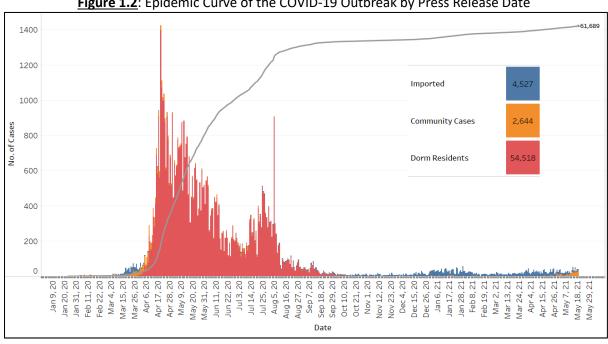

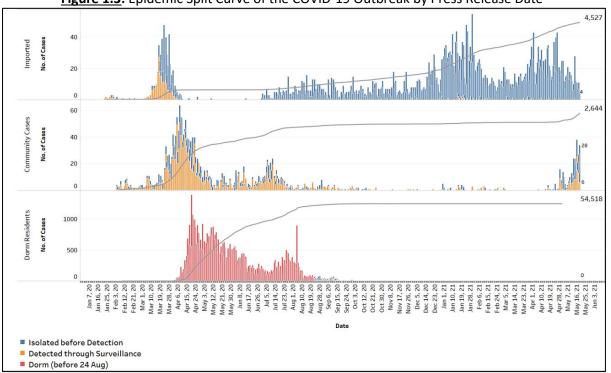

Figure 1.2: Epidemic Curve of the COVID-19 Outbreak by Press Release Date

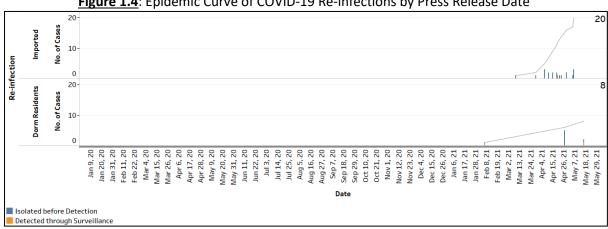

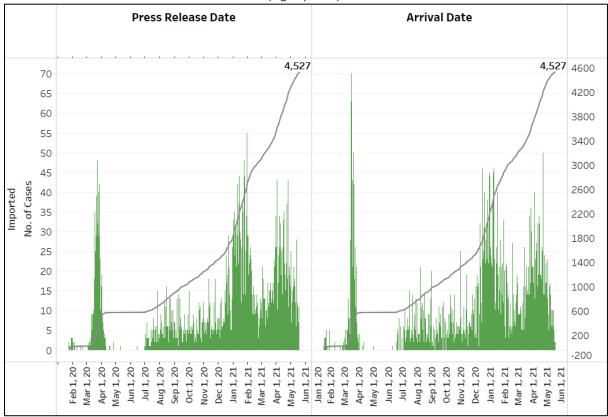

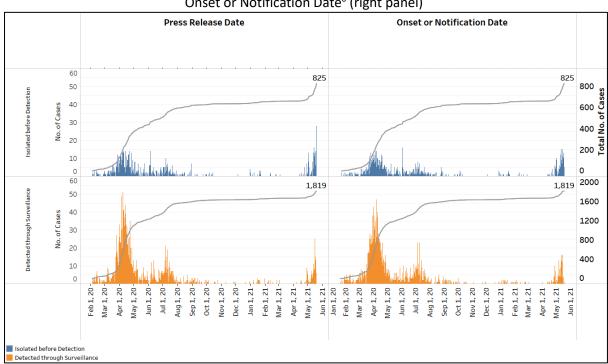

Figure 1.4: Epidemic Curve of COVID-19 Re-infections by Press Release Date

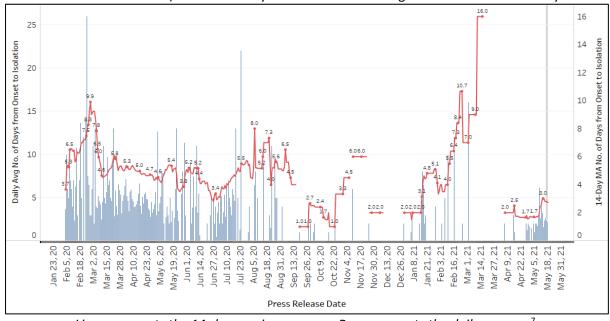

<u>Figure 1.6</u>: Epidemic Curve of Community Cases by Press Release Date (left panel) and by Symptom Onset or Notification Date<sup>6</sup> (right panel)

<u>Figure 1.7</u>: Average Number of Days from Onset of Symptoms to Isolation (QO, hospital admission or notification to MOH) for Community Cases Detected through Surveillance in Each Day

Line represents the 14-day moving average; Bar represents the daily average<sup>7</sup>

<sup>&</sup>lt;sup>6</sup> Date of notification was used for cases that did not display any symptoms. The numbers with onset in the past few days may see an increase as more cases are notified.

<sup>&</sup>lt;sup>7</sup> Area in grey demarcates data points for the past 3 days where some cases may still be pending epidemiological investigation. The bar graph shows the daily average number of days from symptoms onset to isolation, while the line graph shows the moving average for the past 14 days. Both graphs exclude cases with no onset date (asymptomatic) in the computation of the average. Community cases with symptoms who are isolated on the same day that symptoms occurred would have an isolation time of 0. There is a gap in the line graph from 16 to 18 Sep as there are no symptomatic cases in the preceding 14 days.

Figure 1.8: Weekly Reclassifications of Previously Reported Cases (next update will be on 24 May)

|  | Imported | Community<br>Linked | Community<br>Unlinked | Dorm<br>Residents | Total  |
|--|----------|---------------------|-----------------------|-------------------|--------|
| Total number of cases as at 10 May   | 4,420    | 1,622               | 818                   | 54,518            | 61,378 |
| Cases reported 11 May -<br>17 May  | 86       | 107                 | 42                    | 0                 | 235    |
| Net reclassifications of previously reported cases, incorporated 11 May - 17 May | 1        | 4                   | -5                    | 0                 | 0      |
| Total number of cases as at 17 May   | 4,507    | 1,733               | 855                   | 54,518            | 61,613 |

| Case   | PR date   | Occupation  | Link  | Rationale for Link  |
|--------|-----------|---|---|---|
| Number |           |   | Reclassification  | Reclassification  |
| 61184  | 26 Mar 21 | Foreign<br>Domestic<br>Worker                                   | Community Unlinked → Imported (Myanmar) - Overseas infection      | Case has recent travel history to Myanmar. She is likely an intermittent shedder previously infected overseas.  |
| 62517  | 28 Apr 21 | Immigration<br>and<br>Checkpoints<br>Authority<br>(ICA) officer | Community Unlinked → Community Linked (Changi Airport Terminal 1) | Case is linked to his workplace,<br>Changi Airport Terminal 1, where<br>he comes into contact with<br>travellers from high-risk countries.  |
| 62941  | 08 May 21 | Student   | Community Unlinked → Community Linked to Cluster 62873            | Case had been at Raffles Medical at Changi Airport T3 on 23 Apr, 30 Apr and 3 May. Case also visited Kopitiam located at Terminal 3 (T3) Basement 2 on 3 May. Two other cases (62942 and 62945) visited the same foodcourt on 3 May. Case likely to have been infected while she was at Changi Airport T3 on 3 May. |
| 62998  | 09 May 21 | Risk<br>Assessment<br>Manager                                   | Community Unlinked → Community Linked to Cluster 62873            | Whole genome sequencing and phylogenetic analysis revealed that Case 62998 is linked to the Case 62873 cluster.   |
| 63005  | 09 May 21 | Landscaper  | Community Unlinked → Community Linked to Cluster 62873            | Case had been at Changi Airport Terminal 3 (T3) on 3 May and 4 May, and had visited same locations as 2 other cases (62940 and 62942) during their infectious period. Case likely to have been infected while he was at Changi Airport T3.  |

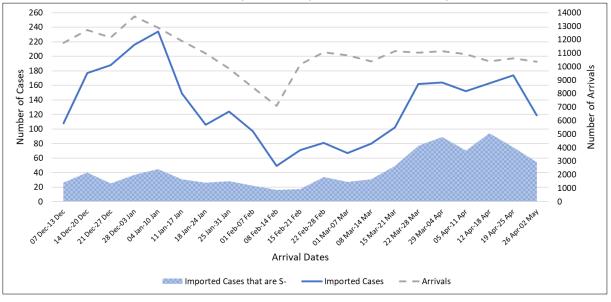

### (2) Imported COVID-19 Cases

Figure 2.1: Serology and Symptom Status of Imported Cases Reported from 06 May to 12 May

| Symptoms     | S+ | S- | Not Serology<br>Tested | Pending Serology<br>Result | Total No. of<br>Cases |  |  |
|--------------|----|----|------------------------|----------------------------|-----------------------|--|--|
| Asymptomatic | 61 | 29 | 0                      | 1                          | 91                    |  |  |
| Symptomatic  | 5  | 6  | 0                      | 0                          | 11                    |  |  |
| Total        | 66 | 35 | 0                      | 1                          | 102                   |  |  |

Figure 2.2: Weekly Total Number of Imported Cases, Imported Cases that are S- and Arrivals from 07

Dec 20 to 02 May 21 (next update will be on 24 May)<sup>8</sup>

\_

<sup>&</sup>lt;sup>8</sup> Data from the past 2 weeks are excluded as arrivals on SHN who arrived in the past 2 weeks may not have their SHN exit test results yet. "Imported Cases that are S-" comprises imported cases who are (a) serology negative; or (b) not tested for serology. "Imported Cases with Ct values 30 and below" have low Ct values which are suggestive of high viral load. Notwithstanding, Ct values should be interpreted with caution along with other epidemiological and clinical factors.

# (3) Number of COVID-19 Cases in Hospitals and Community Care Facilities

**Figure 3.1**: Summary of Confirmed Cases by Status in the Past 14 Days

| Press           | •   | Admitted in spitals | In Cono                            | Total R             | ecovered                       | Total            |        |
