Total since start of outbreak	581	768	282	158	4	1,212	454	127	76	5	662	1,874	-	41,206	-	43,661
Population at risk4												5,381,000		323,000		5,704,000
Prevalence												0.03%		12.76%		0.77%

<sup>&</sup>lt;sup>1</sup> Previously we had tracked the work permit holders living outside dormitories as a separate category, and put a large number of these workers on Stay Home Notices (SHN). The SHN for these workers has since expired. Hence we have now updated the definition of "Cases in the Community" to include all cases (including amongst work permit holders) that are detected outside of the dormitories.

 $<sup>^{\</sup>rm 2}$  Includes cases pending epi-investigation.

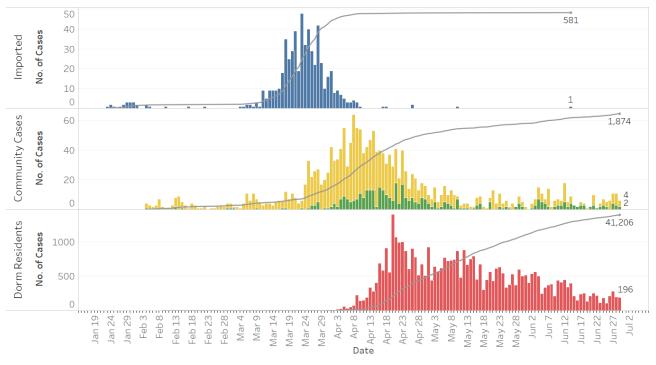

<sup>&</sup>lt;sup>3</sup> Includes Training Work Permit (TWP) holders.

<sup>&</sup>lt;sup>4</sup> Population at risk for community cases includes SC/PRs and work pass holders not residing in dormitories. Source: MOM and Singstat.

Figure 1.2: Epidemic Curve of the COVID-19 Outbreak by Press Release Date

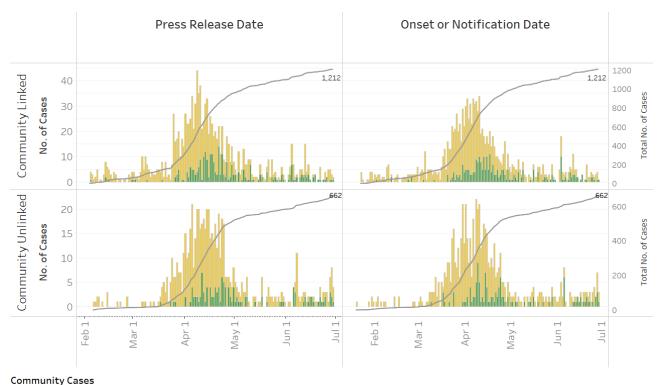

#### COVID-19 Cases

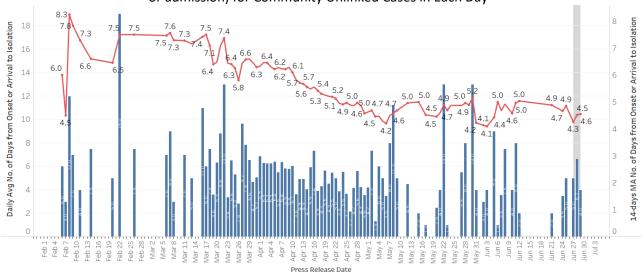

- Imported
- Community Cases: SC/PR + G or F (other pass types) + Visitors
- Community Cases: G or F (work permit)
- Dorm Residents

<u>Figure 1.4</u>: Epidemic Curve of Linked and Unlinked Cases among the Community by Press Release Date (left panel) and by Symptom Onset or Notification Date<sup>5</sup> (right panel)

Community Cases: SC/PR + G or F (other pass types) + VisitorsCommunity Cases: G or F (work permit)

<u>Figure 1.5</u>: Average Number of Days from Onset of Symptoms to Isolation (QO, MOH contact, notification or admission) for Community Unlinked Cases in Each Day<sup>6</sup>

Line represents the 14-day moving average; Bar represents the daily average<sup>7</sup>

<sup>&</sup>lt;sup>5</sup> Date of notification was used for cases that did not display any symptoms. The numbers with onset in the past few days may see an increase as more cases are notified.

<sup>&</sup>lt;sup>6</sup> Area in grey demarcates the data points for the past 3 days where some cases are still pending investigation. The bar chart shows the daily average number of days from onset date to isolation, while the line chart shows the moving average for the past 14 days. Both charts exclude cases with missing onset dates in the computation of the average.

<sup>&</sup>lt;sup>7</sup> Asymptomatic community unlinked cases are not reflected in this chart. Community unlinked cases with symptoms who are isolated on the same day that symptoms occurred would have an isolation time of 0.

# (2) Number of COVID-19 Cases in Hospitals and Community Care Facilities

Figure 2.1: Summary of Confirmed Cases by Status in the Past 14 Days
